Enviro-Pro Geosynthetics Announces Integration into Keymay Industries

As of July 7, 2016 Enviro-Pro Geosynthetics now “Keymay Industries”

Sherwood Park, AB July 7, 2016— Keymay Industries is pleased to announce the full integration of Enviro-Pro products, services and personnel into the Keymay portfolio. In an effort to streamline operations and maximize the quality of solutions available to each client within the Civil, Pipeline, and Municipalities markets, Keymay will re-brand and incorporate the full suite of geosynthetic supplies and installation services. Following the acquisition of Enviro-Pro by Keymay in 2010, the two companies had operated with separate identities. Don Gunn, President of Keymay Industries explains, “Our customers value our ability to be a “one-stop shop”, and so we felt the timing is ideal for us to bring our brands together under one identity”.

The history of solution-oriented customer service that earned Enviro-Pro Geosynthetics its excellent reputation is a strong feature within Keymay’s Vision: *Unparalleled service and innovation to support the needs of our customers and wherever new opportunities exist.* The founders of Enviro-Pro are an integral part of the business and see the merger as a positive event for their existing and future clients. “Operational excellence is not just about cost-savings and cross-selling, it’s about building a team culture that places the customer at the center of everything we do,” says Randy Prodahl, founder of Enviro-Pro Geosynthetics and 30-year veteran in oilfield construction.

Going forward, customers can expect quicker response times on proposals, improved availability of equipment and personnel for field services, as well as cost efficiencies passed on to the customer. The leadership team at Keymay will consist of core employees from Enviro-Pro, who will together service the pipeline, facility, road-building and municipal infrastructure construction markets. The product and service offerings will continue to grow in sync with the demands of the market, with a primary focus on innovative, engineered solutions.

Keymay Industries is a leading manufacturer of pipeline weights, supplier of engineered geosynthetics and provider of specialized field joint coating services. Learn more at www.keymay.com
